Contact Email: Careers@hymec.net

Contact Number: [01752 511002](tel:01752 511002)

Job purpose Summary:

The main purpose of this role is to process raw machined parts accordingly to their destination (further treatment). This will include basic deburring as well as polishing aesthetic aerospace component under tight timescales whilst maintaining attention to detail and quality required.

Key Responsibilities & Accountabilities:

- To process parts accordingly to required finish using hand and power tools,
- To adhere to company procedures,
- Identify parts to technical drawing/job card, book times into a relevant operation, inspect your own work, book parts out including any non-conforming parts, sign paperwork and pass job to next process,
- Report discrepancies in parts and/or paperwork,
- To work in conjunction with Company's Health and Safety policy and report any health and safety concerns,
- To present flexibility towards time of work and to work in other departments when required,
- Continue to help/improve work environment and carry out housekeeping duties in line with 5S.

Additional Information:

- Endurance – This role requires bending, standing and lifting throughout the day. If you have a physical limitation that could be affected by these duties, this role would not be suitable.

Working shifts:

- To be discussed.
